

Xantrex™ GT30
Small Commercial

www.xantrex.com/gt30

Xantrex
is becoming

Schneider
Electric

Our evolution to Schneider Electric, the global specialist in energy management, re-affirms our commitment to provide you with innovative solutions, best-in-class customer service, and exceptional quality in everything we do. We are proud to be your partner, and we are dedicated to helping you make the most of your energy.

Our company
needs to be
as dependable
as the sun
rising every day.
It only seemed natural
we'd power it
with solar.

Small commercial applications have big power needs.

Uptime is critical, and efficiency, low weight and small footprint are a must.

The Xantrex GT30 has market leading weight, size and efficiency backed with the best service program in the industry.

The natural choice for dependable power

What you want to know:

The GT30 is easy and hassle-free to install:

Revolutionary size and weight for the power size

- The GT30 is significantly smaller and lighter than central inverters and multiple single phase inverters.
- The GT30 can be wall or floor mounted with an optional pedestal. It boasts superior performance, efficiency and reliability:

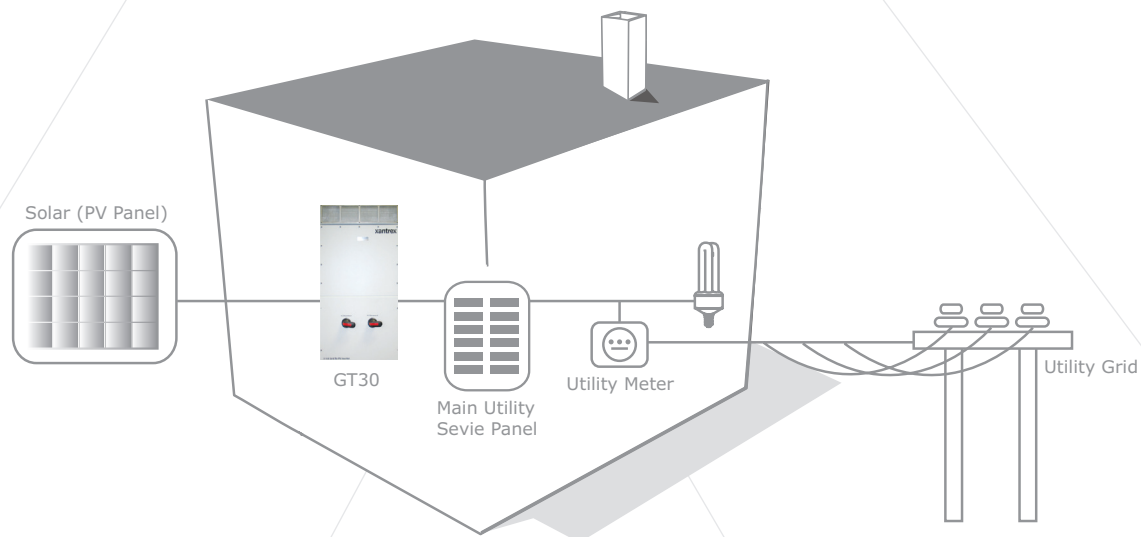

Higher efficiency increases kWh production for a given sized array, or reduces array size for a given kW output

- The GT30 offers leading CEC efficiency - 96% - compared to the competition (all inverters at 208V AC output).
- Closed design for air cooling does not require filters which require maintenance and does not introduce contaminants near sensitive components such as control boards.
- Industrial grade design with aluminum enclosure for corrosion resistance.

- Use of longer life thin film capacitors, rather than electrolytic type capacitors.
- Strategy to prevent obsolescence where key components such as control boards and front panel displays are backwards compatible to older inverters.

The GT30 comes with a superior after sales service offering

- All GT Series inverters are backed by a standard 5 year warranty with a 10 or 15 year optional extended warranty available
- Preventative maintenance programs are available
- Optional uptime guarantee available
- Largest field service team in the market geographically dispersed to provide rapid service
